

AIC to supply new electrical cabinets for the EAF area to SISE (Spain)

As an urgent request, Siderúrgica Sevillana, S.A. (SISE) awarded Automazioni Industriali Capitanio (AIC) the order to design and supply electrical cabinets and auxiliary equipment of the electric arc furnace (EAF) area for the plant, located in Spain. Focusing on the needs of our customers, all parts of the equipment were assembled, tested, certified and delivered to the customer's plant within three weeks. The guarantee and remote support were also included in the scope of supply.

After successful start-up, the customer shared his positive feedback and expressed the gratitude to the AIC team for their efforts and diligence in completing this project.

AIC is a global system integrator providing advanced and tailored automation and robotic solutions for the steel industry, with the aim to continuously improve both efficiency, competitiveness and safety of the production processes. With more than 1000 applications worldwide and more than 40 years of history, AIC can boast a unique experience in both greenfield and revamping projects in meltshops and long products rolling mills.

Siderurgica Sevillana S.A. is a company based in Alcalá de Guadaíra (Seville), part of the Electric Arc Furnace steel sector, which uses ferrous scrap and converts it into usable products in other basic sectors of the country's economic activity. Its activity is centered on casting and hot-rolling steel, which it has been doing since the mid-60s. It is an integral part of the RIVA Group, a multinational leader in the steel sector, with a presence in Europe and Canada.
