

FAM Ferriera Alto Milanese contracted AIC to supply new control panels

FAM Ferriera Alto Milanese contracted AIC Automazioni Industriali Capitanio to supply new control panels for the bar-in-coil rolling mill in Caronno Pertusella (VA), Italy. The new project will reduce future maintenance costs, improve troubleshooting and increase system flexibility. The scope of supply includes:

- New control panels;
- Replacement of the existing GE CPU and GE node (in the local command pulpit with Rockwell Automation point I/O node);
- Engineering and electrical drawings;
- PLC software development based on Rockwell ControlLogix;
- HMI control system upgrade.

AIC will be also involved in installation supervision and commissioning phases.

AIC is a global system integrator providing advanced and tailored automation and robotic solutions for the steel industry, with the aim to continuously improve both efficiency, competitiveness and safety of the production processes. With more than 1000 applications worldwide and more than 40 years of history, AIC can boast a unique experience in both greenfield and revamping projects in meltshops and long products rolling mills.

Since 1961, FAM Ferriera Alto Milanese SpA manufactures hot rolled profile for wire-drawing in bars and coils, and top-quality mercantile bars. The company covers 20,000 square meters area with two buildings and four industrial areas. FAM is specialized in manufacturing special profiles according to customer design that shows its manufacturing flexibility and ability to meet specific customer needs.
